Subject: RE: follow-up TIME-SENSITIVE - IMPORTANT TSCA SACC Ad Hoc Member Request - Meetings in Sept, Oct, Dec dates (possibly Nov) - 4 Questions regarding "Impartiality": 5 chemical risk evaluations

Jim – The Agency does a full ecological risk assessment including aquatic toxicology and there are a series of questions on ecological risk assessment. We need to have expertise in this area as the permanent panel has one person who is an aquatic toxicologist. I am trying to add expertise for one or more of the meeting dates I mentioned below.

Regards,
Sharlene

Sharlene,

I don't have experience with any of these compounds so I would likely not be able to contribute substantially. Also, many of these are not an issue in aquatic toxicology so I am wondering if most are focused on human health, which is not my area of expertise.

This is a follow-up e-mail to the one I sent about 10 days ago. I've addressed this message to all current or prospective TSCA SACC ad hoc members, "bcc," to avoid inadvertent replies to all.

Greetings!

Thank you for your interest and participation on the TSCA SACC as ad hoc member.

The TSCA SACC has a very busy schedule in 2019 with meetings scheduled from June through December 2019. On December 19, 2016, EPA published a list of 10 chemical substances that are the subject of the Agency's initial chemical risk evaluations, as required by TSCA § 6(b)(2)(A). The docket numbers, problem formulations, scope documents and supplemental documents for the 10 chemical substances that EPA initiated the risk evaluation process for in December 2016 can be found here:

- [Pigment Violet 29](#) (TSCA SACC meeting, June 2019)
- [1,4 Dioxane](#) (TSCA SACC meeting, July 29-Aug 2, 2019)
- [Cyclic Aliphatic Bromide Cluster \(HBCE\)](#) (TSCA SACC meeting, July 29-Aug 2, 2019)
- [1-Bromopropane](#) TBD (tentative Sept 10-12, 2019)
- [Methylene Chloride](#) TBD
- [N-Methylpyrrolidone](#) TBD
- [Perchloroethylene](#) TBD
- [Trichloroethylene](#) TBD
- [Carbon Tetrachloride](#) - TBD
- [Asbestos](#) - TBD

Future meetings will focus on the Agency's draft risk evaluation for the remaining seven (7) chemicals: 1-bromopropane, methylene chloride, N-Methyl-2-pyrrolidone (NMP), perchloroethylene, trichloroethylene, carbon tetrachloride, and asbestos. For planning purposes, please respond to the four questions regarding "impartiality" with respect to 1-bromopropane, methylene chloride, N-Methyl-2-pyrrolidone (NMP), perchloroethylene, and trichloroethylene (see word file attached).

Please indicate your availability for the following dates September 10-12, 2019 (1-Bromopropane), October 21-25, 2019, and December 2-6, 2019.

A public announcement of the specific draft chemical risk evaluations for the September meeting will be published with the next 2 weeks; however, we need to make sure that there is a quorum of TSCA SACC members and adequate representation of expertise (additional ad hoc members) to address the Agency's charge before the official announcement is published. Time is of the essence. Please contact me if you have questions or concerns.

Thank you.
